25th March 2016

Dear Customer

Price Increase affecting Medical Gloves Only

Recently it has being brought to our attention by our Disposable Glove supply partners **SUPERTOUCH** that their Medical Grade Gloves have increased in price by €4.92 per case/1000.

As you are aware Medical Grade Gloves have to conform to all legal requirements as the safety of users and anyone coming in contact with them has to be taken very seriously. They are tested and proven to ensure that our customers are protected from any microorganisms, bodily fluids etc. and that they are what they say they are.

The **SUPERTOUCH** Medical Gloves we supply you with have an Acceptable Quality Level (AQL) of 1.5 – meaning up to 1.5 Gloves per hundred could be faulty but in the market we find Gloves with an AQL as low as 30.

We have put all the supporting documentation from our manufacturers **SUPERTOUCH** on our website www.westernhygiene.ie

The price increase of €4.92 per case will apply to Medical Grade Gloves **Only** commencing on 1st May 2016.

In the meantime please speak to our representative for more information on this and on our full range of gloves.

We thank you sincerely for your business in the past and for your understanding in this matter and we look forward to being of service to you in the future.
