

# CLASSROOM

HYGIENE ZONE

# Premium Products & Solutions At Competitive Prices!

Germs thrive in places where people interact in close proximity. Therefore, it is not uncommon to see the transmission of bugs and contaminants amongst individuals within a classroom setting, leading to illness and absenteeism.

As a hygiene zone, it can often be viewed as a complex area – whether as a result of high footfall, poor hygiene practices amongst students, poor air circulation and much more. Western Hygiene are experienced in this sector and offer progressive and effective hygiene solutions to combat the ever-present challenge of staff and student safety and well-being. From our eco-friendly product range, to signage, training and services – Western Hygiene are there to partner and to help!
